Dear Cell leaders

I am delivering a series of Sunday sermons in June/July about Church Shape which will be significant to the way we work together as a church in the future. To help you apply some of the main points, I am also writing the cell material related to this. Because I want it to clearly link in with my sermons I will be writing them together, which means that you will receive the material a little later than usual.

I would like all cells to use this material for these three weeks so that everyone has the opportunity to examine the details of what I will be sharing. I do hope, that even if you do not normally use the prepared material, that you will find it a valuable series.

It may be a good opportunity to invite people who are not in cells to join you for this series. I will be encouraging people from the pulpit to make a point of being in a cell to follow up my sermons and to join one if they're not in one already.

I do hope you find the material helpful!

Many thanks for your leadership of your cell.

Matthew
